# PLANS POLAR TRIP

Brooklyn Man Believes He Has Practicable Craft.

FOR YEARS A PILOT 569 - 04 T 8 F 8 T

Captain Clinton Willing to Take His Six Children on a Test Voyage.

NEW YORK, Jan. 15.-Capt. James A. Clinton, for twenty-five years a pliot in and around New York, is confident that he has solved the secret of a proc-ticable airship. To prove it he is willing to take the air route to the North Pole, guiding his own craft and taking his six little children as passengers.

A propellor driven by a turbine and

capable of either raising or lowering the airship is one of the secrets of the Clin-ton craft. Another is the driving propeller, which forces air against the rudler in a manher which enables the ship to be always under control of the nav: gator, independent of contending air currents, which have proved the undom, of other airships.

Cantain Clinton secured in 1896 a pat-ent on his turbine device, which he will install in his airship. He has now applied for letters patent on the completed ship.

cigar-shaped balloon eighty feet long and about twelve feet at the central diameter. The balloon will be con-structed of oiled silk, and divided into urce of supply installed in the sus-

many years a pilot on the Pennsylvania

I have worked on my airship for nine "I have worked on my airsnip for nine-teen years," Captain Clinton said yes-terday, "I believe I now have it per-fected. I have invented it on an entire-ly new partiers found in air navigation. The same barriers found in air navigation, are those present in water navigation, are those present in water navigation. tend with forces assailing from every direction. As long as its aluminum, iron and silk hold out the ship will find its way all over the earth and against all winds, and never higher than a safe dis-

tince.

'ii am experienced in the United States geological survey, and have not tile least doubt of what I have invented and patented. I would like a chance to prove, as I believe I can do, that at least one American knows more about airships than any Frenchman who ever tried his hand at the work."

Captain Clinton is seeking capital to build his airship.

### Failure

to cure indigestion is largely due to the old theory that when the stomach becomes inactive it needs something to mechanically digest its contents, and cathartics, purgatives, etc., are used, which give only temporary relief, because they digest by irritating the lining of the stomach.

Modern science recognizes the fact that it is the nerves that furnishes motive power to digest the contents of the stomach.

stomach.
The nerves agitate and mix the food, and stimulate the secretions. When and stimulate the secretions. When they become weakened they lack energy and indigestion, dyspepsia, sour stom-

CAPT. JAMES A. CLINTON.

### MAY IRWIN TO LECTURE ON DOMESTIC SCIENCE

MILWAUKEE, Jan. 14.-May Irwin, the comedienne, has accepted an offer from a New York lyceum bureau to join mestic science, and kindred topics.

The financial inducements held out to Miss Irwin are said to be only second structed of oiled silk, and divided into compartments so that a puncture of the covering will affect only one compartment. The balloon will be inflated at the will of the navigator from a source of supply installed in the sus-

### BOSTONIAN HONORED BY FRENCH ACADEMY

PARIS, Jan. 15 .- Whitney Warren has received an exceptional honor at the hands of the French Academy of Fine ranks of platform speakers. She Arts, Mr. Warren, who is a Boston It is a dirigible craft, sustained by a will lecture on high art in cookery, do- architect and made plans for the New York Yacht Club, has been elected a cor-responding member of the Academy.

# LA FOLLETTE WATCHED

Senators Wink at Suggestion That Wisconsin's Solon Will Enter Fight on Rate Problem.

There is much interest in the course of Senator La Follette on the rate reguation question. If he has any no.io forcing himsalf forward in national affairs, he will likely yield to the pressure that is being brought to induce him to make a great speech on the question in the Senate. It would be rather audaclous. It might bring upon him a frost such as Beveridge incurred when "orated" too early in his Senatorial career. But what La Follette would say would be addressed to the country, and the country would hear it even if Senators took to the cloak rooms.

Wisconsin supporters of the Badge Senator are demanding that he take a hand and give the nation the benefit of the Wisconsin experience in trying to curb the railroads. If he makes a speech on this question as a Senatorial salutatory it will be interesting in more ways than one,

La Follette and Dolliver appeared in Congress at the same time. They were he two youngest members of the House when they were elected, back in 1886.

HOBOES GO TO LONDON

FOR QUEEN'S CHARITY

LONDON, Jan. 15.—The institution of the Queen's Unemployed Fund, and the numerous other charitable funds and relief works that have been started in London on behalf of the poor, have resulted in a rush to the metropolis of tramps and wastrels from all parts of the country.

Several workhouses on the line of route from the north are crowded with tramps on their way to London.
